

MAXI 1300

Welcome

The name Maxi has for decades, been synonymous with well-built boats which, due to their high quality, have ensured that the company has carved itself out a special reputation within the boat world. Today, Maxi Yachts manufactures yachts from 40 – 42 ft. and is designed by world champion and Olympic medallist Pelle Petterson. Maxi Yachts quality concept has led to the fact that more than 16.000 boats have been produced since it founded. In terms of production, Maxi represent a successful synthesis of advanced technology, modern production methods combined with traditional craftsmanship.

Concept

Enhancing the Maxi experience. Owning a Maxi yacht is all about the love of life at sea. Regardless of size, a Maxi is built to be the optimal choice of short-handed performance cruiser. The typical Maxi owner is a passionate yachtsman seeking the perfect balance between performance and comfort. Our built-to-last safety and attention-to-detail quality thinking go without saying. What is more important is the experience you will get from the easy handling of the yacht, the uncompromising comfort when living on board, and the new, distinctive, eye-catching Scandinavian design. Outside as well as below deck.

Design

The design of our boats is revealed not only by lines and beauty. Although that admittedly, is the aspect of design work that results in boat enthusiasts stopping to stare. It is the design behind the seaworthiness of our boats that causes boat enthusiasts to stay on as Maxi owners for boat after boat, year after year. Using quality craftsmanship in one hand and the most advanced computer technology in the other, we have opted to invest in active research and development for our boat models. We have developed many of the components in our boats ourselves, or in collaboration with our suppliers. This makes us the driving force behind Maxi design at all levels, and guarantees Maxi owners both beauty and excellent seaworthiness.

Quality

Quality is our guiding star most closely associated with Maxi owner emotions and expectations. Emotions are individual and often expressed as simply as stroking a highly polished surface or a lingering look at the lines of the deck. To satisfy our own pride in our work, and the expectations of Maxi owners, we always choose the finest materials and the best components from the most professional suppliers and manufacturers for every boat. Our choice is simple – we choose the best – but the process of choosing correctly requires solid professional expertise. Which is something for which Maxi owners have relied on us for many years.

Comfort

When boat enthusiasts are at home sitting on their sofas they long to be back aboard their boats. We make sure that when they are aboard their boats they do not long to be back home sitting on their sofas. A Maxi shall always provide the comfort at sea that Maxi owners demand for themselves and their families. Irrespective of model, every detail is developed so that its function shall maintain the feeling of comfort and the satisfaction of being surrounded by quality. Our efforts frequently result in unique examples of functionality, that a Maxi owner can only find in their boat.

Safety

A boat owner wants a safe boat for his family, himself and his guests. A small plate is fitted to all our boats. This is proof of our good cooperation with the well-known Norwegian classification society, Det Norske Veritas, DNV. This cooperation entails that DNV carry out type approval, planned product control and random controls throughout the entire production process. Maxi owners are familiar with our thoughts on safety in our boats and at sea, but the small plate provides them with a guarantee they are right about us. Right about our safety standards and their choice of boat for themselves, their family and their guests.

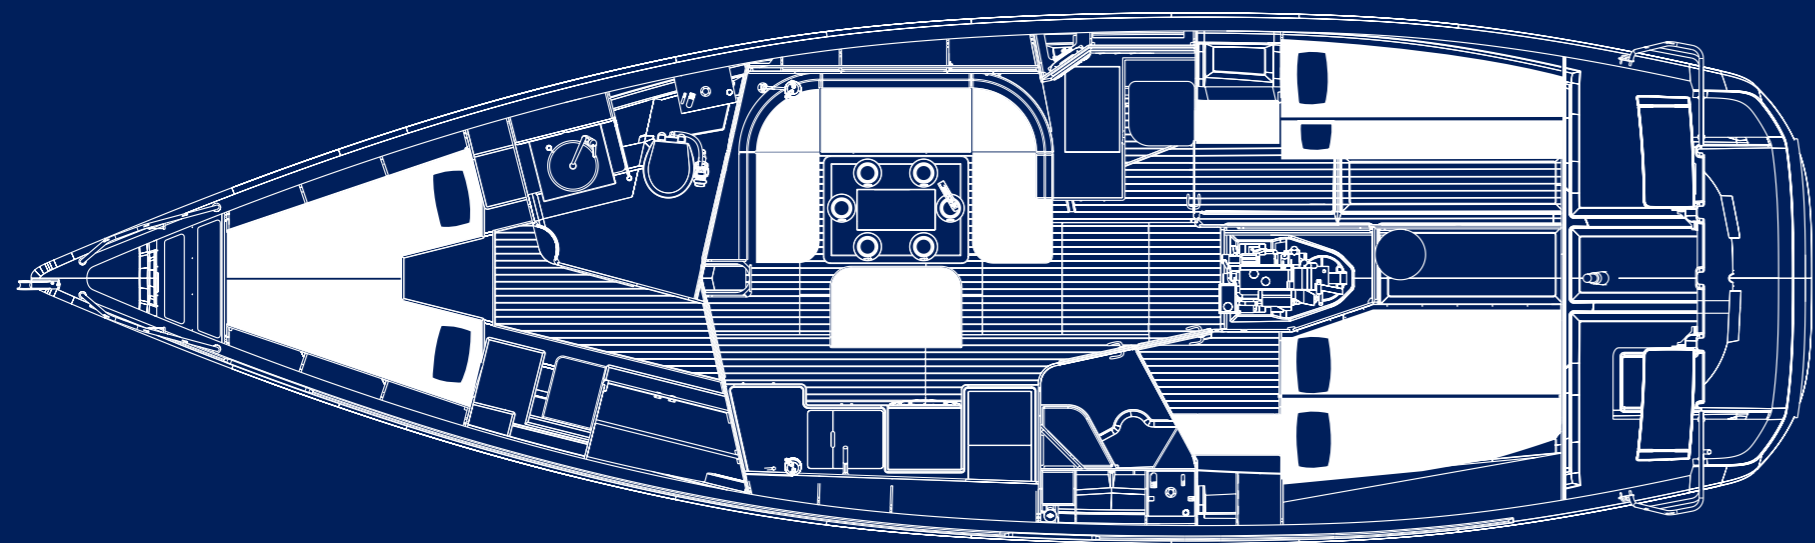

MAXI 1300

A true short-handed performance cruiser, the Maxi 1300 is designed for the sailing enthusiast who does not fear a challenge and loves the wind in his hair, cutting through rough waves and the feeling of unity with a yacht full of character. Every detail of Maxi 1300's deck is thoroughly crafted to ensure maximum pleasure and safety in any conditions. Twin steering wheels allow easy control and four winches are specifically displaced for easy access by a lone sailor. The refined production technology, selection of the best in materials and components, coupled with a range of cutting-edge technical solutions result in unmatched quality of the

entire structure ensuring safety for the crew. The interior, built in accordance with the best traditions in craftsmanship oozes the impression of elegantly understated Scandinavian aesthetic and comfort.

The wealth of emotions evoked by the Maxi 1300 is difficult to put in a single word. There will be sports emotions and adrenaline; pride and adoration for the smooth lines and design; there will also be deep relaxation ensured by the luxurious interior. Welcome to the world of true experience. Welcome aboard Maxi Yachts.
